

Conscious, Natural Sustainability AnanthVana @ Kabini

KABINI

The land of spectacular landscapes and wildlife

The rustle of leaves blowing in the wind, the deep silence of the forest, the chirping of birds and the calmness of River Kabini, all whisper the breathtaking beauty of this most wonderful land. Everyone, from a wildlife enthusiast to the nature lover, and the average citizen have a reason to love Kabini, known as one of the country's richest biodiversity spots.

About AnantaVana

AnantaVana is a unique and exclusive sustainable reforestation project nestled in the serene landscapes of Kabini. Designed for nature enthusiasts, AnantaVana offers a sanctuary where individuals can reconnect with the natural world. In collaboration with VanaTvam and Indus Herbs, this project fosters a community of like-minded landowners who are deeply committed to preserving the rich biodiversity of Kabini. Each Farm plot within AnantaVana serves as a personal retreat, offering a tranquil space for rejuvenation, while also playing a vital role in maintaining the ecological balance of the region. AnantaVana is not just a land investment but a conscious lifestyle choice for those who wish to immerse themselves in nature's embrace.

About us

Welcome to Vanatvam – Where Nature and Community Thrive

At Vanatvam, we create sustainable communities that blend modern comfort with eco-friendly living. Each project is designed to respect nature and foster a self-sustaining, connected lifestyle. Here, you're not just buying land—you're joining a movement toward a greener, more meaningful way of life

“Conscious, Natural Sustainability
is the mantra at VanaTvam”.

CONSCIOUS COMMUNITY

Our intent is to evolve conscious communities who care about nature as well as socialize to take care of each other's well being.

NATURAL FARMING

Natural farming aims to maintain the natural balance of ecosystems and avoids the use of hazardous pesticides and fertilizers and promotes biodiversity.

SUSTAINABLE PLANET

This concept of sustainability emphasizes the importance of collaboration and cooperation in achieving sustainable and equitable use of the earth's resources.
