UNVEILING THE SECRET VANAS OF OUR MADHUVANA

VINAYAKAVANA:

is a sacred grove dedicated to Lord Ganesha, designed for Ganapati puja. This vana features 21 sacred plants, each chosen for its spiritual significance, arranged meticulously around a central Ganapati shrine. The serene environment supports worship, meditation and reverence for new beginnings and wisdom.

SHIVA PANCHAYATANAVANA:

is a sacred grove honoring Lord Shiva's five divine forms: Shiva, Shakti, Ganesha, Surya, and Vishnu. Each shrine is surrounded by symbolic plants and sacred herbs, offering a serene space for devotion, meditation, and spiritual connection with Lord Shiva.

RASHIVANA:

Rashivana is a sacred garden in Indian culture where each zodiac sign (rashi) is represented by a specific plant. These plants emit positive energies, enhancing the qualities of their signs and promoting harmony and spiritual balance, blending astrology, nature, and spirituality.

NAKSHATRAVANA:

is a sacred garden in Indian culture where 27 trees correspond to the 27 Nakshatras (lunar constellations) in Vedic Astrology. Each tree holds unique energies that influence health, well-being, and spirituality, deepening one's connection to the cosmos.

SARASWATIVANA:

Is a sacred garden dedicated to Goddess Saraswati, embodying purity, learning, and creativity. Filled with specific plants symbolizing her qualities, it offers a serene space for meditation, study, and spiritual growth, inviting connection to divine wisdom and artistic inspiration.

COZY COTTAGE

Stay in Our Eco-Friendly Cozy Cottage

A rustic, comfortable retreat designed with sustainability in mind.

Interior and exterior views of the cottage, showcasing natural materials and eco-friendly features, sustainable amenities, energy-efficient design, and a natural retreat experience.

DISCOVER THE ABUNDANCE OF PLANTAINS IN OUR FARMLAND

ENDANGERED SPICES

Spices are vanishing due to habitat loss and over-harvesting. Climate change and deforestation threaten their survival. Kadamba, Manoranjita, and Seetashoka are examples of endangered spice species. Conservation efforts are necessary to protect these valuable resources. Preserving endangered spices ensures biodiversity and culinary heritage.

ORGANIC FRUIT BEARING TREES

FRUIT BEARING TREES

provide sustenance, shade, and ecosystem benefits. They support local wildlife, pollinators, and soil health. Mango, Apple, and Banana trees are examples of fruitful harvests. fruit bearing trees promote food security, income, and community wellbeing. Planting and preserving fruit bearing trees ensures a fruitful future.

COMMUNITY PLANTING FOR A HEALTHIER TOMORROW

community planting fosters unity and cooperation for a shared goal. Together, we cultivate greenspaces, promoting physical and mental well-being. By growing our own fruits and vegetables, we ensure access to fresh, healthy produce. Community planting educates and empowers individuals on sustainable living practices. Collective efforts today create a healthier, more sustainable tomorrow for all.
